Operations

1. Calling

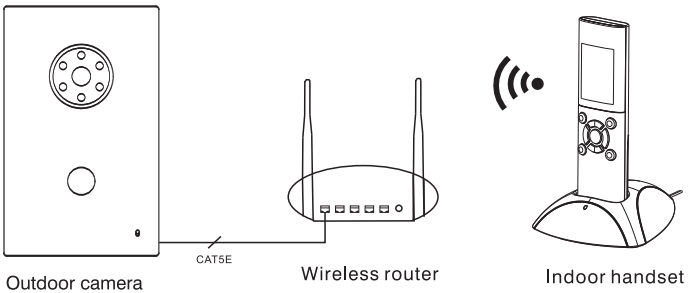
When the visitor presses the call button on outdoor camera, the indoor handset will ring and you can see the visitor through LCD display. Pressing **Answer**, the indoor handset will stop ringing and then the conversation will start. Press the button or **Unlock**, the door can be open. Press the button **Hang up** to end the conversation.

2. Calling neighbors

If you want to call your neighbor by the indoor handset, press the button **call** to choose. There are some names you have ever added into your indoor handset just like the Contacts in the Web Settings. Choose the number and press the button **Call**. In this way you can talk with your neighbor without going out.

System Connection

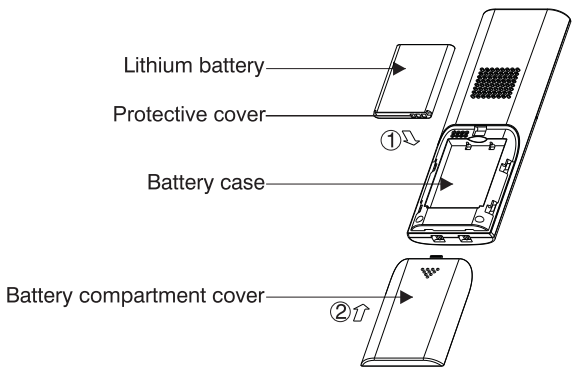
Simple system configuration



Installing Batteries

The rechargeable lithium battery (3.7V, 1100mA) comes with your indoor handset. Install the battery before use.

1.



2. Insert new battery as indicated, matching correct polarity(+,-).

3. To replace the battery cover, slide the cover up until it snaps in place.

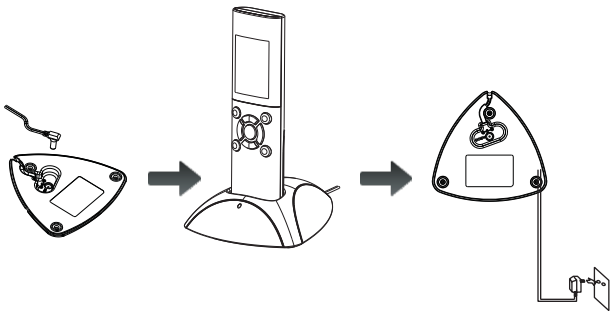
Notes:

1. To activate battery please remove protective cover from the battery prior to use.

2. The battery needs to be replaced lif it doesn't recover its full storage capacities after recharging.

3. When replacing the battery, make sure using good quality re-chargeable lithium battery. Never use other battery or conventional alkaline battery.

Installation Instruction



Connect the modular end of the AC power adapter to the power jack of the charger, then plug the AC adapter into a standard AC wall outlet.

Charging Indoor Handset

! Important Note*: Before initial operation,* ***YOU SHOULD FULLY CHARGE THE INDOOR HANDSET*** *for about* ***5*** *hours.*

To charge the indoor handset, you should place it on the charger base.

Notes

Maintenance of devices

1. Keep the surface clean and use soft dry cloth to clean the dust of the product.
2. Please turn off the power of indoor handset when cleaning the indoor handset.
3. If there is stubborn stain which cannot be cleaned with dry cloth, please use the soft towel dipped in the neutral diluted detergent to clean the machine and then clear it with dry cloth.
4. Do not use benzene, thinner or organic solvents such as gasoline for cleaning, may cause damage to the machine casing or surface and change colors.

Matters need to be noticed

1. Read the instructions in this manual carefully. Be sure to keep it for future reference.

2. Be sure to use only the power adapter and power source which match the rating listed for them. If you are not sure, check with your dealer or with your local power company.

3. Avoid strong hits or shocks. Do not use the power adapter if it is has received any hard knocks or looks damaged in any way; please immediately contact an authorised service center.

4. The product should be placed where it is stable, windy, air-dry, non-sunshine, non strong magnetic and non dusty.

5. Don't clean the surface with chemicals but with soft and clean dry cloth.

6. Don't press several buttons at the same time.

7. The outdoor and indoor unit must be matched with appointed specified models and cannot match with others that are not our products.

8. Don't disassemble the machine without authorization. As for the need of fault repair, please contact the distributors or the company's tech-supporting department.
